NETHRAA

HI-TECH ENGINEERING

Indian Manufacturing. European Partnerships.

Integrated stainless steel component manufacturing for global OEMs.

Coimbatore, Tamil Nadu

Manufacturing Base

Dresden, Saxony

European business development

OUR MANUFACTURING TEAM / COIMBATORE

1989 → Present

From a Craftsman's Vision to an Engineering Legacy

About us

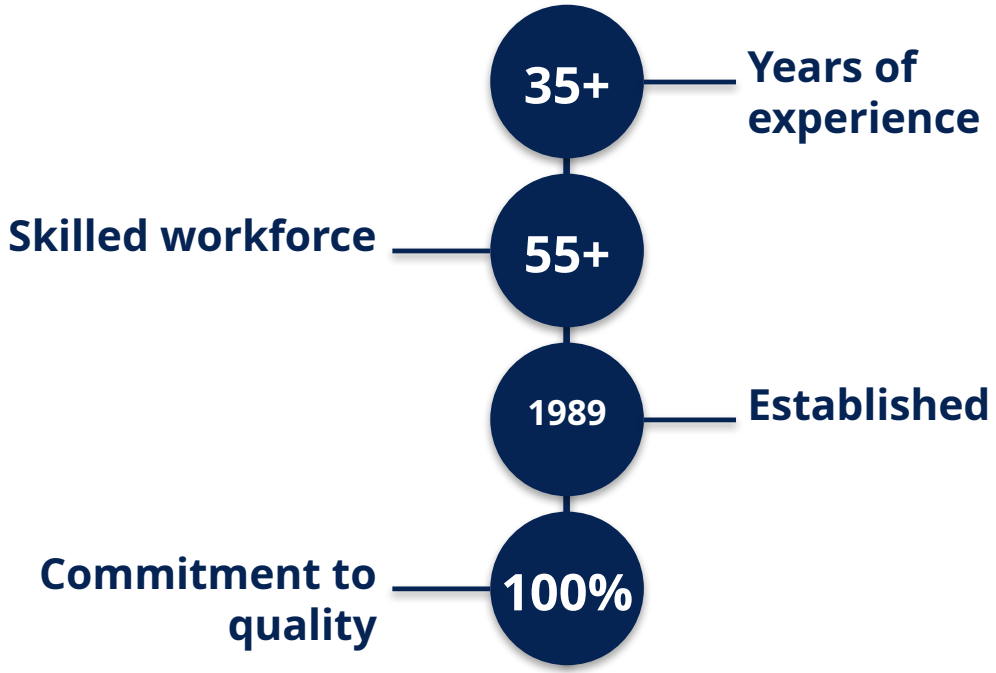

Precision engineering rooted in craftsmanship, combining stainless steel fabrication and pump-component expertise with modern CNC manufacturing.

- **Quality focused**
- **Customer focused**
- **Advanced machinery**
- **Skilled workforce**

Core manufacturing focus

Pump components • Stainless steel fabrication
Custom OEM manufacturing
V-Guard • Crompton

Company at a glance

Company profile figures; workforce subject to update.

Integrated manufacturing capabilities

Seven process stages, grouped into six capability areas.

Material preparation & cutting

Coil handling and blanking

Rolling & forming

Cylindrical shells

Welding & fabrication

Argon-shielded / TIG

Expansion & pressing

Sizing and end profiles

CNC & conventional turning

Functional interfaces

Finishing & inspection

Inspection and dispatch

Established expertise. Expanding horizons.

Material versatility and drawing-based manufacturing for industrial OEMs.

Core manufacturing segments

Pumps & fluid handling
Pump housings, motor shells and tubes

Custom OEM fabrication
Application-specific components

General engineering
Formed, welded and machined metal parts

Strategic growth segments

- Industrial equipment
- Agricultural equipment
- Food processing equipment
- Automotive components

MATERIALS / SS 202 · 304 · 316 · 409 · 410 · 430 | Mild steel

Custom manufacturing from drawings, CAD files, prototypes and technical specifications.

Product portfolio / 1

Stainless steel housings, shells and casings for pump and motor OEMs.

Open-well pump housing

SS 304 | ID 112–140 mm

Sample length 300 mm

Borewell motor housing

SS 304* | ID/OD 92/96 mm

Length 700 mm

Submersible pump casing

SS 304 | ID 80–89 mm*

Length up to 2,000 mm

Open-well motor shell

SS 304/316 | ID/OD 126/130 mm

Wall 2 mm

* Grade / diameter range provisional; final dimensions per approved drawing.

Product portfolio / 2

Stainless steel housings, shells and casings for pump and motor OEMs.

Oil-cooled motor shell

SS 304/316 | ID/OD 92/96 mm

Wall 2 mm

Sewage motor housing

SS 304/316 | ID/OD 137/140 mm

Wall 1.5 mm

Shallow-well pump housing

SS 304/316 | Custom sizes

To customer specifications

Motor housing – assembly

Internal core view

Customer-specific design

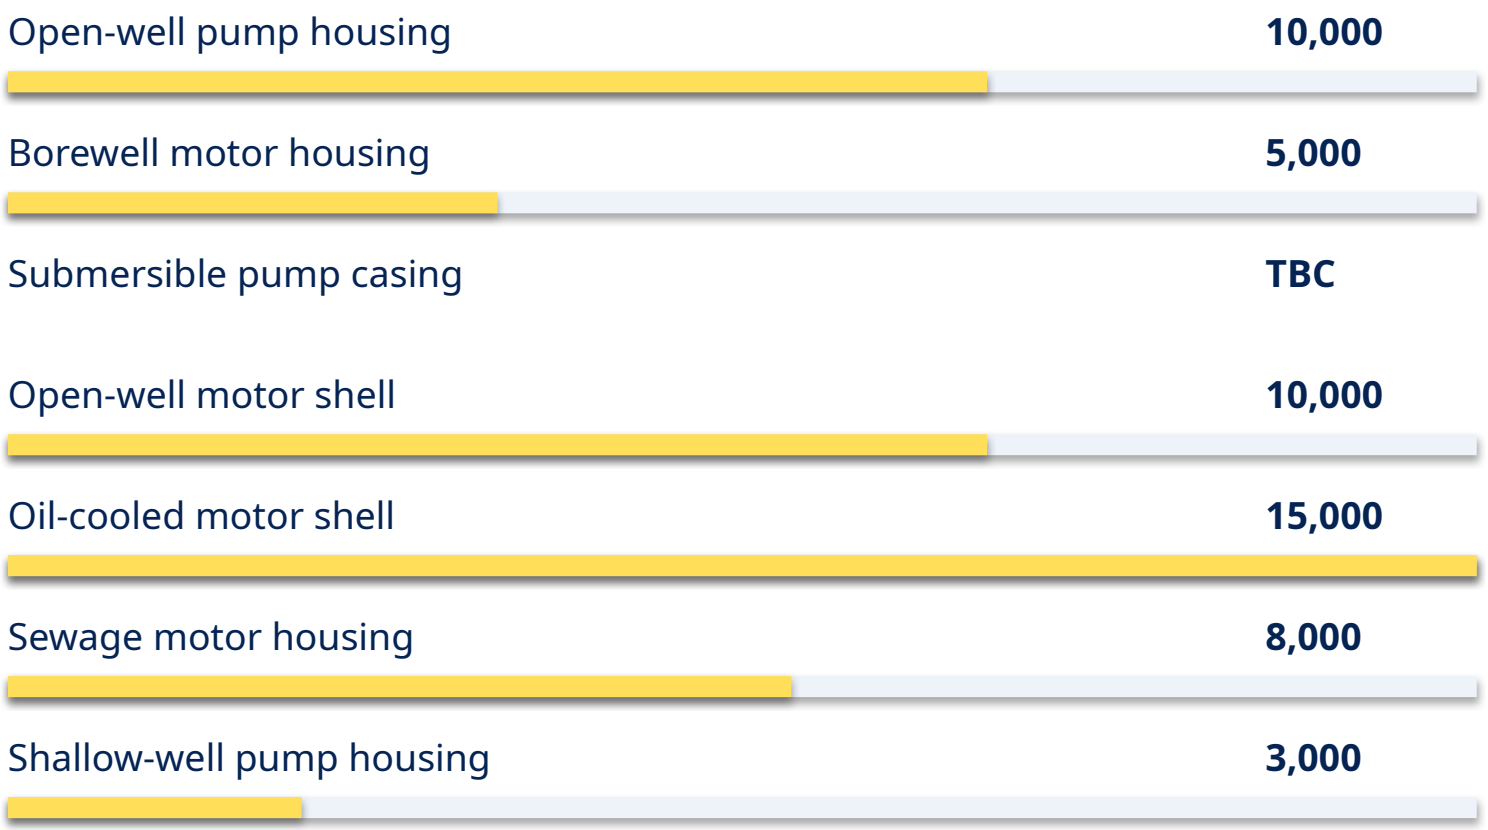

Manufacturing scale

Indicative monthly volumes by product family.

6

Product families with reported volumes

Indicative monthly figures; actual capacity and availability confirmed per RFQ.

Reported figures are indicative, not guaranteed capacity.

Why partner with Nethraa?

Built on expertise. Engineered for growth.

Engineering heritage
Experienced technical workforce and CNC expertise

Quality-focused production
Manufacturing to customer specifications

Integrated manufacturing
Forming, welding, machining and finishing

Scalable OEM solutions
Customized components and recurring production

Long-term partnerships
Collaborative approach to supplier development

Let’s build your next component.
